

mechanical blockable gas spring

part number 998.600

blocspring **

a continuous variable
blockable series of
gas springs.

by means of a knob you can
fix the piston rod in any
position you want.

the locking force is 50 KG.

these gas springs are
suitable for height
adjustable workstations
or similar constructions
where a counter weight is
available.

damaging the piston rod
has no consequences for
the good function of the
gas spring.

deliverable are gas springs
with a hexagon piston rod
of 8, 10 and 13 mm and a
force of 100 up to
2500 Newton.

these blocsprings can be
provided with all kinds of
fixing devices as ball joints,
forks and eyes.

available with release valve
and stainless steel model.

** patent granted.
